UV DRYER 4039

FOR UNIVERSAL OBJECTS

UV DRYER 4039

DUBUIT

The **UV dryer 4039** is designed for curing universal shaped objects. The objects are placed on the fiber belt conveyor and pass in straight line through the curing chamber.

This machine can cure plastic and glass objects of all different shapes: cylindrical, conical, flat and oval.

A precision parabolic reflector focuses the UV rays all around the object surface to ensure optimum curing using the lowest energy.

- ▶ **Easy to maintain**
- ▶ **Fiber glass belt**
- ▶ **2 UV lamps each 12 inches long with 300W /inch lamps**

Options available on this machine:

- ▶ Special gallium lamp to dry glass objects
- ▶ 400W /inch lamp for more power
- ▶ Electronic Power Ballast: Control from 0 to 100%
- ▶ Special configuration for large objects
- ▶ Longer conveyor and special cover protections

TECHNICAL DATA

POWER:	8 to 9 KW
SIZE OF OBJECTS:	
Max Height:	330mm
Max Thickness:	220 mm
Bigger objects can be cured (optional)	
Conveyor Speed:	0-14 meter/min
Higher speed:	0-35m/min available on request

▶ Plastic object curing

▶ Glass object curing

▶ Adjustable conveyor speed

▶ Big object curing
